

HI THERE - I'M

Asyraf Shaleh Malik Ibrahim

Welcome to my portfolio

let's explore the creative space and growing with every project

[View Work](#)[Get in touch →](#)

A storyteller through *visuals.*

My name is Asyraf Shaleh M.I I'M 17 years old now and currently focusing on my studies while diving deep into IT world. I'm an active person who loves programming, it, and exploring about how a tech works. Besides my obsession with tech, im currently building my path to become an engineer

Besides having talent in the IT world also have talent in the automotive field, such as servicing motorcycle engines, electrical systems, and other mechanical components. Beyond the automotive world, i am also talented in sports, like swimming, running, basketball, and badminton, But what matters most is that i always try to balance learning technical things with keeping my physical fitness.

[Programming](#)[Web Development](#)[Sports](#)[Automotive](#)

What I Bring

Programming

About turning creative ideas into structured, efficient, and functional logic

Problem Solving

Turning obstacles into opportunities, build more efficient solutions.

Public Speaking

Confident presenting, MC work, and workshop facilitation at institutional events.

Tools I reach for daily.

Nothing exotic. Just the right tools, used well.

VS Code

Where the code lives, Clean, Fast, and endlessly configurable.

Github

Version control, collaboration, and keeping a clean history of everything built

Vercel

Deploy in seconds, iterate fast, The smoothest way to get projects live without the hassle

HTML/CSS/JS

The foundation. Understanding the web at its core make everything else make sense

Databases

Comfortable with structured data from simple queries to designing schemas that scale

Terminal

CLI- first workflow. Faster, cleaner, and a lot more satisfying than clicking through menus.
